

Postmatic 6000SA Stamp Affixer

Model 6000SA Stamp Affixing Attachment For Use With Pitney Bowes Mailing Machines

The Model 6000SA Stamp Affixer converts a Pitney Bowes mailing machine into a high speed, high production stamp affixer. Simply remove the meter and inking system and place the Model 6000SA in the meters place. Use it in-line with your inserting equipment or off-line as a separate operation.

The Model 6000SA applies stamps as fast as the Pitney Bowes will cycle, up to 15,000 pieces per hour. It will apply pressure sensitive stamps available from the USPS in coils of 3,000 or 10,000.

The Model 6000SA is built and backed by POSTMATIC, a company with more than 30 years experience manufacturing stamp affixers. Precision designs and rigid quality control assures years of trouble-free use.
