The 1030 Tabber – fast, efficient sealing of self-mailers

The Secap 1030 Tabber quickly applies tabs or wafer seals to newsletters, double postcards, small catalogs, tri-fold brochures and other open ended self-mailers.

It pays for itself by efficiently applying the tabs required by the postal service for self-mailers to qualify for substantial ZIP+4 and Barcoded discounts.

It creates professional looking mail with tabs that provide a neat looking appearance, keeps the mail piece's edges from folding over and it doesn't damage the material when it's opened. (like tape or staples do).

Reel capacity up to
10,000 tabs

Top loading hopper adjusts for
different sized media and
continuous operation

Holds as many as 250- 8 1/2" x 11",
tri-folded sheets in a single load

Sturdy construction

Resettable LCD counter
(counts only tabbed pieces)

Tab sensitivity control
optimizes performance

Simple controls – Start Feed,
Start Tab, Stop Feed/Tab

Reliable and Easy to Maintain

- Sturdy construction, built to function consistently in the rugged mailing operations environment.
- Maintenance requires little more than regular cleaning.

Versatile

- Applies round, 1" tabs (Backing Paper up to 1 1/4").
- Applies clear, colored and white tabs.
- Processes media from 3" x 5" to 11" x 11", up to 5/32" thick.
- Handles a variety of stocks-coated, bond, recycled, card
- Saves the cost the cost of an envelope.
- Can be used for double tab applications by running the mail with two passes.
- In-line ready*, operates with most address printers, labelers, folders, etc.

*Requires optional kit for in-line operation
