simply innovative

## > MULTI-ACTION MOVEMENT

The Sure-Place Attachment device will eliminate costly hand placing projects. The reciprocating pick arm and multi-action movement consistently retrieve the most unusually shaped items and places them accurately in the inserter track. The vacuum sensor provides a miss detection to be wired into the existing detection circuit on your inserter.

## > OPTIONS

Eliminate off-line glue tipping operations by adding our hot glue melt system and glue tip in line with inserting. Our optional hot glue melt system can be interfaced to your inserter in conjunction with the Sure-Place Attachment. With a small pattern of glue, you can place any promotional piece on top of the glue spot.

## > CUSTOMIZED MAGAZINE CONFIGURATION

Standard magazine for most applications, optional custom magazines are available for material having unusual shapes.
