The Affordable Tabbing Solution

Model 1012 Tabber & Label Affixer

It Pays To Tab!

Economical and efficient, the Secap Model 1012 Tabber automatically applies adhesive tabs/wafer seals to open-ended mail in accordance with postal regulations.

- **Fast** — Applies tab/wafer seals at production speeds.
- **Reliable** — Consistent, accurate application. Proven performance.
- **Versatile** — Accepts roll or fan-folded stock. Also, operates as high speed pressure sensitive address labeler.

Seal Open-Ended Mail at High Speeds Without the Cost of In-Line Tabbing.

Preparing your mail with the Model 1012 is cost effective. This off-line system affixes tabs/wafer seals on open-ended mail to maintain your postage discounts. It seals a variety of media up to 1/4" thick at production speeds. The 1012 sets up easily and switching between different applications is a snap! Practical and versatile, the Model 1012 is the preferred tabletop tabbing solution.
